PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with hands-on experience in TypeScript, React, Node.js, and NestJS, focused on payments and integrations. Built Stripe, ACH, and payment method management features at Turno, leading the frontend rewrite and owning work from architecture through rollout. Shipped Uber Travel and third-party booking integrations, including frontend tech lead responsibilities. Founded and led Inovad, delivering web and mobile systems for startups and enterprises using AWS, React Native, and modern delivery practices. Actively working with AI tools and harness engineering.

TOP SKILLS

TypeScript, JavaScript | Node.js | NestJS | React | Next.js | Claude & MCP tools | Stripe integrations | Large-scale development | Harness engineering | React Native | PHP (Laravel) | AWS, GCP

EXPERIENCE

Senior Software Engineer
Sept 2025 – Present

Turno

- Rebuilt and expanded the payments platform supporting the host and cleaner products within Squad International & Payments.
- Led the frontend rewrite of the payments module, delivering Stripe integrations, ACH bank account flows, co-badged card networks, and payment method management.
- Owned delivery end to end, from requirements and architecture through implementation, code review, and cross-functional coordination with PM and QA.
- Applied Claude and MCP tools to streamline the Turno payments workflow, building a harnessed engineering approach to validate AI-assisted outputs and reduce manual iteration during delivery.

Senior Software Engineer
Apr 2022 – Apr 2025

Uber · San Francisco, CA

- Shipped booking features for Uber Flights and Uber Tour, later consolidated into Uber Travel for flights, trains, and buses inside the Uber app.
- Owned the frontend integration with Hopper for Uber Flights, navigating a complex third-party contract boundary for UK and Spain bookings.
- Implemented split ticketing for Uber Tour, handling purchase flows, pricing logic, and multi-leg journey edge cases.
- Served as frontend tech lead, establishing coding standards, strengthening codebase structure, and shaping technical direction for the team.

Senior Software Engineer
Jun 2021 – Apr 2022

Luxury Presence · Santa Monica, California, United States

- Built a serverless TypeScript and AWS Lambda ETL pipeline that ingested, transformed, and normalized real estate data from multiple third-party APIs for search.
- Improved data consistency and search performance across thousands of listings consumed by internal systems.
- Delivered CRM features with React and GraphQL.
- Partnered with product and data teams to define schemas and strengthen API integrations.

Founder & Software Engineer
Aug 2014 – Feb 2022

Inovad · Curitiba, Paraná, Brazil

- Founded Inovad to deliver web and mobile solutions for startups and enterprises such as Philips, Klabin, and the Rosicrucian Order.
- Led delivery from discovery and architecture through team management, client communication, and deployment.

- Managed hiring and engineering execution to keep projects aligned with product and business goals.
- Delivered projects across healthcare, education, logistics, and public services using React, React Native, Node.js, AWS, GitLab CI/CD, and Scrum.

Project Manager & Software Engineer
Jan 2020 – Apr 2021

MeuEstaR (contract via Inovad) · Curitiba, Paraná, Brazil

- Led the technical delivery of MeuEstaR, a mobile app for rotating parking tickets in Curitiba's public areas.
- Shipped the full solution with two engineers using React Native and Node.js, launching in app stores within 29 days.
- Coordinated with city stakeholders to ensure legal and operational compliance.
- Delivered a high-availability app processing 2,000+ parking transactions per day.

Senior Frontend Engineer
Jan 2020 – Aug 2020

MedPrev (contract via Inovad) · Curitiba, Paraná, Brazil

- Defined scope and roadmap directly with the client for Medprev's institutional website.
- Built dynamic UI components in vanilla JavaScript and integrated the frontend with the REST API.
- Set up AWS deployment infrastructure with EC2, S3, and Route 53.
- Ran Agile ceremonies, demos, and stakeholder updates while mentoring the team on logic and technical decisions.

Senior Frontend Engineer
Jan 2019 – Jan 2020

Klabin (contract via Inovad) · Telêmaco Borba, Paraná, Brazil

- Designed the initial Angular frontend architecture for a production planning system.
- Built core UI components and integrated production and inventory data through the client's REST API.
- Helped optimize factory planning to reduce paper waste by approximately 8%.
- Participated in Scrum ceremonies and supported delivery from build to rollout.

Head of Technology
Aug 2018 – Sept 2019

Monest (contract via Inovad) · Curitiba, Paraná, Brazil

- Designed and implemented AWS-based services architecture, customer and operator frontends, and API documentation in NestJS and Postman.
- Helped scale the platform to support 100+ clients and more than R$10 million in debt portfolio.
- Led the engineering team while aligning product, design, and marketing needs.
- Built KPI and BI dashboards in Metabase and MySQL and removed technical blockers in the sales funnel.

Senior Software Engineer
Jan 2017 – Jul 2017

Philips (contract via Inovad) · Amsterdam (Remote)

- Designed and implemented frontend architecture from scratch with Philips' internal team.
- Built cloud deployment workflows on AWS.
- Aligned business logic and technical solutions through client and team collaboration.
